TOPOLOGY SEMINAR

Derived geometry V: Topics in derived symplectic geometry

By

Ilker Kadri Berktav
(Bilkent University)

Abstract: In this talk, we will continue our discussion on shifted symplectic structures. We will then present several key results in DSG. If time permits, we will briefly mention our work in that setting, focusing on the development of shifted contact structures and related results.

Date: May 26, Monday, 2025
Time: 13:30
