Cartan-Eilenberg theorem and some computations

By

Ergün Yalçın
(Bilkent)

Abstract: We will continue our discussion on cohomology of groups. I will review the definition of transfer and Mackey formula and prove Cartan and Eilenberg's stable elements theorem. I will also show how to calculate cohomology of some well-known small finite groups.

Date: November 5, 2018

Time: 13:40 – 15:00

Place: SA141 Mathematics Seminar Room

* Tea and cookies will be served after the talk. All are most cordially invited.
