Rank conditions for finite group actions on 4-manifolds

By

Semra Pamuk
(METU)

Abstract: In this talk, we will investigate and try to give some old and new partial answers to the question: what is the maximum rank of a finite group which acts effectively, locally linearly and homologically trivially on closed, orientable 4-manifold.

Date: November 11, 2019 Monday

Time: 13:40 – 14:40

Place: SA141 Mathematics Seminar Room

* Tea and cookies will be served after the talk. All are most cordially invited.
