Derived geometry I: Basics of infinity-categories

By

Ilker Kadri Berktav
(Bilkent University)

Abstract: This is the first in a series of talks on derived symplectic geometry and neighboring subjects. In this talk, we present background material on various notions of infinity-categories.

Note that this will be the first talk in a sequence of four lectures on introduction to derived geometry.

Date: Mar 3, Monday, 2025

Time: 13:30

Place: SA141
