

Quantum Computing Seminar

Classical simulation of quantum circuits

By

Hakop Pashayan
(Freie Universität Berlin)

Abstract: I will give some background on classical simulation then I will present a general framework for simulating quantum circuits using quasiprobabilistic methods. Through examples, I will demonstrate the strengths of this approach in its runtime performance, flexibility and generality.

Date: Friday, May 26, 2023

Time: 14:30

Place: SA141 - Mathematics Seminar Room & ZOOM
