

TOPOLOGY SEMINAR

Basic constructions in quasicategories

By

Igor Sikora
(Bilkent)

Abstract: The goal of this talk is the discussion of the basic notions and constructions in the theory of infinity categories. We want to discuss the following constructions: the product of quasicategories, homotopy category of a quasicategory, join, slices and, most importantly, colimits and limits.

Date: Monday, Feb 27, 2023

Time: 13:30 (UTC+3)

Place: Zoom
