Free Actions on Products of Real Projective Spaces

By
Ergün Yalçın
(Bilkent University)

Abstract: We recently proved the homotopy-theoretical version of a conjecture by Cusick from 1983 on free actions of elementary abelian 2-groups on products of real projective spaces. In this talk I will explain the main ideas of the proof after introducing the necessary background.

Date: October 6, Monday, 2025

Time: 15:30 UTC+3

Place: SA141 & ZOOM
