

Analysis Seminar

On compactness of Hankel operators

By

Mehmet Celik
(Texas A&M University)

Abstract: In this talk, we survey some recent developments on the compactness property of Hankel operators from several complex variables' perspectives. At the beginning of the presentation, we will recall some concepts and notions. Later, we may present an application and point out open parts of some problems in the context. The presentation contains results from collaborations with Timothy Clos, Sonmez Sahutoglu, Emil Straube, and Yunus Zeytuncu.

Date: Wednesday, December 8, 2021

Time: 18:00-19:00, GMT+3.

Place: ZOOM
